Samar Mustafa

Applied AI Architect | Multi-Agent Systems | Enterprise Design Systems

samar@betterfound.ai | +44 (0) 7950 764 293 | linkedin.com/in/samarmustafa | samar-mustafa.vercel.app | London, UK

Professional Summary

Applied AI Architect who designs teams of AI agents that build real software, with people in charge of the decisions that matter. I plan, direct and govern multi-agent systems from first prompt to shipped app, with a focus on architecture, evaluation and safe delivery in the enterprise.

Built an agent factory that has shipped 6 apps (about 9 hours and $38 per build), and founded two live AI products: Betterfound (12 merchants and pilots) and Heumyn AI (450 active users). Backed by 13 years leading Canon EMEA's design system across 57 localised websites in 27 languages, so I know how to take AI from prototype into governed, accessible, production-grade delivery.

Core Competencies

- **Multi-Agent Architecture:** Design specialised planning, building and review agents with human approval gates on spec and release
- **LLM Engineering:** Per-task model routing (Haiku/Sonnet), context and prompt engineering, ~70% prompt-token reduction, streaming at sub-second time to first token
- **MCP & Integration:** MCP-first products, Claude Code sub-agents, Figma MCP, enterprise PIM and CMS integration patterns
- **Evaluation & Quality:** Eval metrics (F1 score), human-agreement testing, defect-catch and false-alarm rates, tests against real databases
- **AI Governance & Safe Delivery:** Human-in-the-loop approvals, tenant isolation, EU AI Act risk classification (AIGP in progress)
- **Enterprise Design Systems:** Design tokens, governance models, WCAG 2.2 AA accessibility, adoption at 27-language scale

Professional Experience

Founder – Betterfound & Heumyn AI | London, UK | 2025 – Present

Design, build and ship AI products end to end, from architecture and model choice to pricing, deployment and customer pilots.

- **Betterfound** – AI product finder that merchants embed on their storefronts, searching the live catalogue and reporting unmet shopper demand. 12 merchants and pilots, 0.8s time to first token, 34% search click-through. Haiku plans searches, Sonnet writes answers; tenant isolation via signed tokens. *Next.js 14, TypeScript, Claude, Postgres 16, Redis, Drizzle, Voyage embeddings, Stripe, Railway.*

- **Heumyn AI** – Job search and CV tailoring platform that searches job boards and career pages and scores fit against a CV (0–100). 450 active users, 18k jobs indexed, 87% filter agreement with human reviewers. Built MCP-first with Claude Code sub-agents, then exposed via web API; per-task model routing cut prompt tokens by ~70%. *React, Vite, Express, TypeScript, Postgres, Claude, OpenAI, MCP.*

Canon Europe (EMEA) | London, UK | 2013 – Present

Design System Lead & Senior UI Engineering Product Owner

- Scaled design system adoption from 30% to 70% across 50+ Canon marketing websites in 27 languages
- Cut component delivery time by 40% through automated workflows; achieved 100% WCAG 2.2 AA compliance across 30+ components
- Launched Canon's first unified design system: 50+ reusable components and a Figma token architecture for global teams
- Created a three-tier governance model with contribution guidelines, versioning and release cycles; led weekly, monthly and quarterly rituals across UX, Engineering, Product and Marketing
- Led migration of 80+ legacy components to a token-based architecture with zero downtime, across 3 product teams and 2 external contributors
- Established an accessibility review process and automated testing pipeline catching 80% of issues, plus inclusive design training
- **Applied AI:** Introduced LLM documentation generation (60% less manual effort), automated accessibility testing and context-based component generation; built Token Chain and a Design Token Usage Tracker with Claude Code
- **Enterprise AI scoping:** Product data quality assistant for the PIM, finding and fixing duplicates, broken relationships, naming, embargo and missing-product issues across connected systems, with people approving every fix

Earlier Career

- **Senior UI Engineer, Addison Corporate Marketing (WPP)** | London | 2011 – 2013 – Led 6 developers delivering component-based UI for FIFA, KPN, BASF, Heineken, Unilever and Visa; reusable libraries cut development time by 35%
- **Frontend Developer, BPP Professional Education** | London | 2007 – 2011 – Accessible marketing components for 10,000+ students and a UI pattern library for the learning platform
- **Frontend Developer, Titan Entertainment Group** | London | 2006 – 2007 – Launched the first responsive ForbiddenPlanet.com on a component-based architecture

Selected AI Projects

- **Agent Factory** (flagship, in use) – Turns a plain-language prompt into a working app using specialised agents for planning, building and reviewing, with human approval gates on spec and release. 6 apps built, 9 hours from prompt to first release, $38 per build. Currently building a programme board app through it. *Claude Code, Anthropic SDK, MCP.*

- **A11yCheck** (built by the factory) – Accessibility testing web app: 92% of known defects caught, 4% false alarms, 38 WCAG criteria covered.
- **Token Chain** – Design token visualiser showing token specifications and dependencies, built with the Claude Agent SDK. Design System Dashboard in build.
- **Agent skills & evaluation** – Code review and optimisation skills, an F1 score evaluation metric, and a Figma MCP proof of concept (all live).

Technical Skills

- **Models:** Claude (Haiku, Sonnet, Opus, Fabel), GPT, Gemini, Mistral, DeepSeek
- **AI Engineering:** Claude Code, Claude Agent SDK, OpenAI SDK, Vercel AI SDK, MCP, Cursor, GitHub Copilot, context engineering, evals
- **Data & Automation:** Postgres, Redis, Supabase, pgvector, Hugging Face, n8n
- **Web & Shipping:** Next.js, React, TypeScript, Vite, Express, Tailwind, Railway, Vercel, Stripe, GitHub, Jenkins
- **Design Systems:** Figma, Tokens Studio, Style Dictionary, Storybook, Chromatic, design tokens, atomic design, Frontify
- **Accessibility:** WCAG 2.2, ARIA, screen reader and keyboard testing, colour contrast, inclusive design
- **Delivery:** Jira, Confluence, Miro, SAFe, Scrum

Certifications

- Claude Certified Architect – Foundations (in progress, Q1 2027)
- AIGP – AI Governance Professional (in progress)
- AI Framework & Foundations – Anthropic
- Certified SAFe 5 Product Owner / Product Manager
- Certified Scrum Product Owner

Speaking & Community

- "AI for design systems teams" – Into Design Systems
- "Vibe coding for designers" talk, and an AI glossary for non-specialists

Education

BSc Applied Business Computing (Scholarship) – Northumbria University, Newcastle, UK, 2003

Awards

- Canon President Award, Customer-Focused Innovation – 2020
- Canon Customer Focused Award – 2014
